Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 13, 25-27, & 29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Referring to claim 13, it is unclear in this claim whether the applicant is claiming a method, process, or apparatus; consequently, this claim is indefinite.

Claim Objections

3. Claims 13, 25-27, & 29 are objected to because of the following informalities:
4. Referring to claims 13, 25-27 & 29. The examiner objection to the usage “associated therewith the improvement including”. The examiner suggests that applicant clarify by claiming a method or system or apparatus and using comprising. Appropriate action is required.

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Art Unit: 2616

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claim 1, 7, 13, 19-29 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 6, & 11 of U.S. Patent No.: 6,629,147. Although the conflicting claims are not identical, they are not patentably distinct from each other because

Claim 1 of the instant application is broader than claim 1 of U.S. Patent No.: 6,629,147. Claim 1 of U.S. Patent No.: 6,629,147 has the added step of maintaining the sequence number corresponding to each output port. It has been held that the omission of an element and its function is an obvious expedient if the remaining element perform the same function as before. Refer to In re Karlson and also note Ex parte Rainu

Claim 7 of the instant application is broader than claim 7 of U.S. Patent No.: 6,629,147. Claim 7 of U.S. Patent No.: 6,629,147 has the added the additional element of logic for maintaining the sequence number which is in the input ports. It has been held that the omission of an element and its function is an obvious expedient if the remaining element perform the same function as before. Refer to In re Karlson and also note Ex parte Rainu.

Claim 13 of the instant application is broader than claim 11 of U.S. Patent No.: 6,629,147. Claim 11 of U.S. Patent No.: 6,629,147 has the added the additional element of logic for maintaining the sequence number which is in the input ports. It has been held that the omission of an element and its function is an obvious expedient if the remaining element perform the same function as before. Refer to In re Karlson and also note Ex parte Rainu.

Specification

7. The examiner objects to the specification because the related applications section of the application does not have the specific number of related US Patent. For example US Patent No.: 6,629,147 should be on this list.
